

# Handbook of the History of Logic

- Volume 1. Greek, Indian and Arabic Logic
- Volume 2. Mediaeval and Renaissance Logic
- Volume 3. The Rise of Modern Logic: from Leibniz to Frege
- Volume 4. British Logic in the Nineteenth Century
- Volume 5. Logic from Russell to Church
- Volume 6. Sets and Extensions in the Twentieth Century
- Volume 7. Logic and the Modalities in the Twentieth Century
- Volume 8. The Many Valued and Nonmonotonic Turn in Logic
- Volume 9. Computational Logic
- Volume 10. Inductive Logic
- Volume 11. Logic: A History of its Central Concepts

# Lecture 1: Proof (2 weeks)

## IL (Intuitionistic Logic)

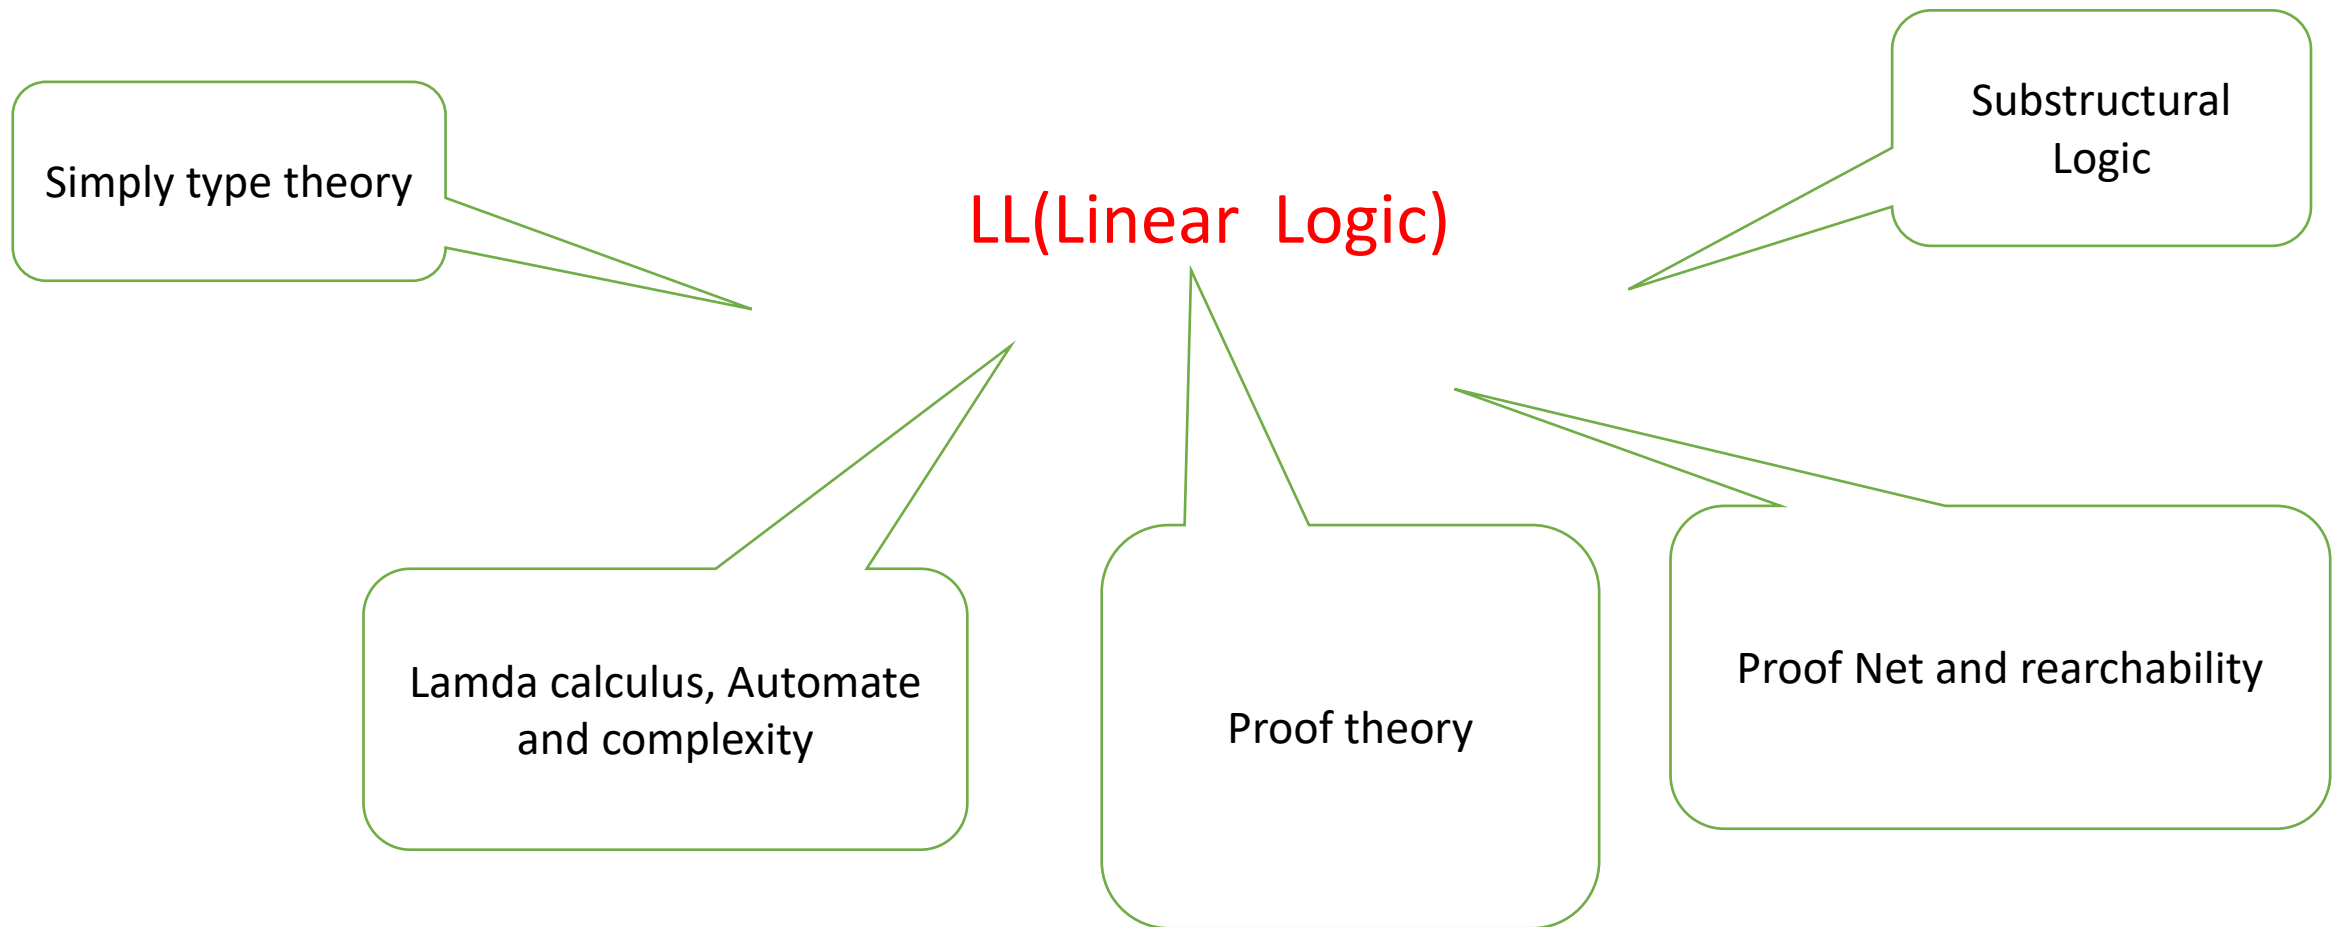

Intuitionistic and  
media logic

Constructive  
mathmative

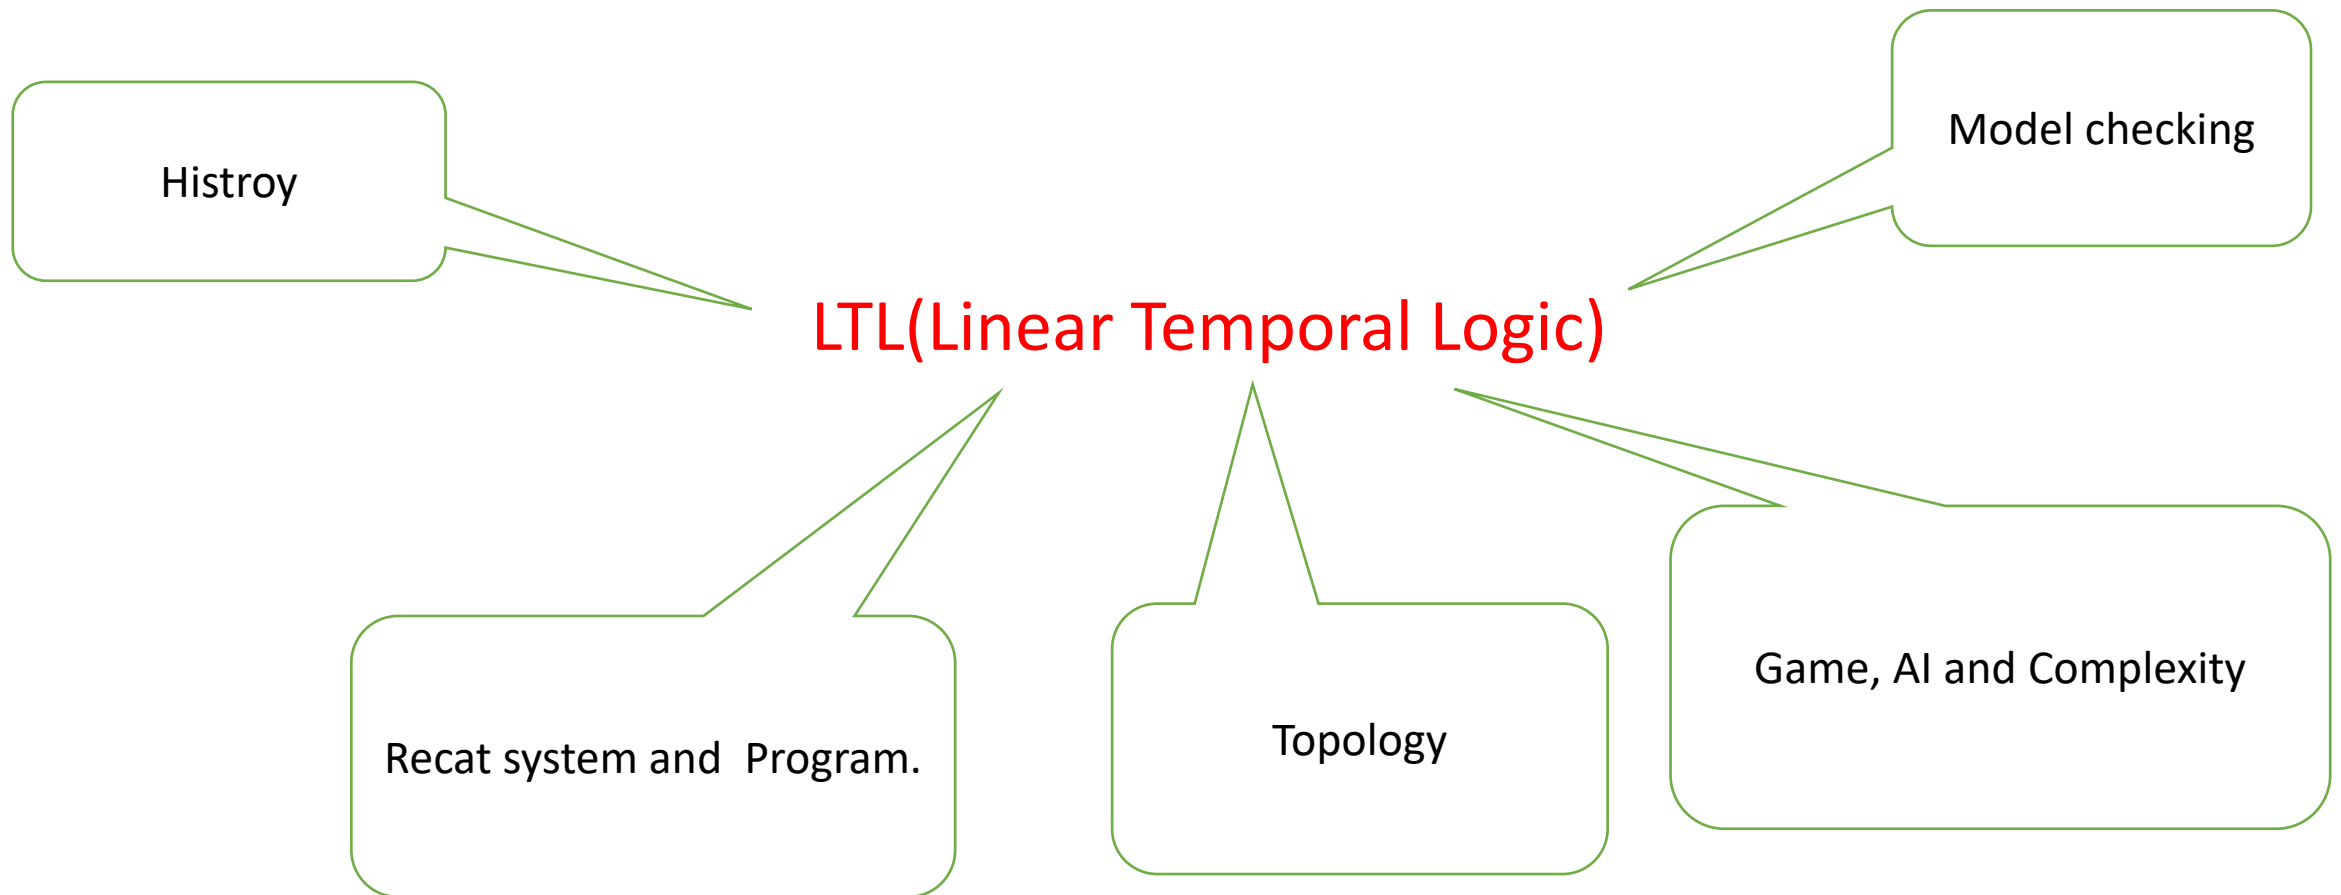

Proof vs Truth

Brouwer`s Creative Subject

## Lecture 2: Type theory and Computational Logic (2 weeks)

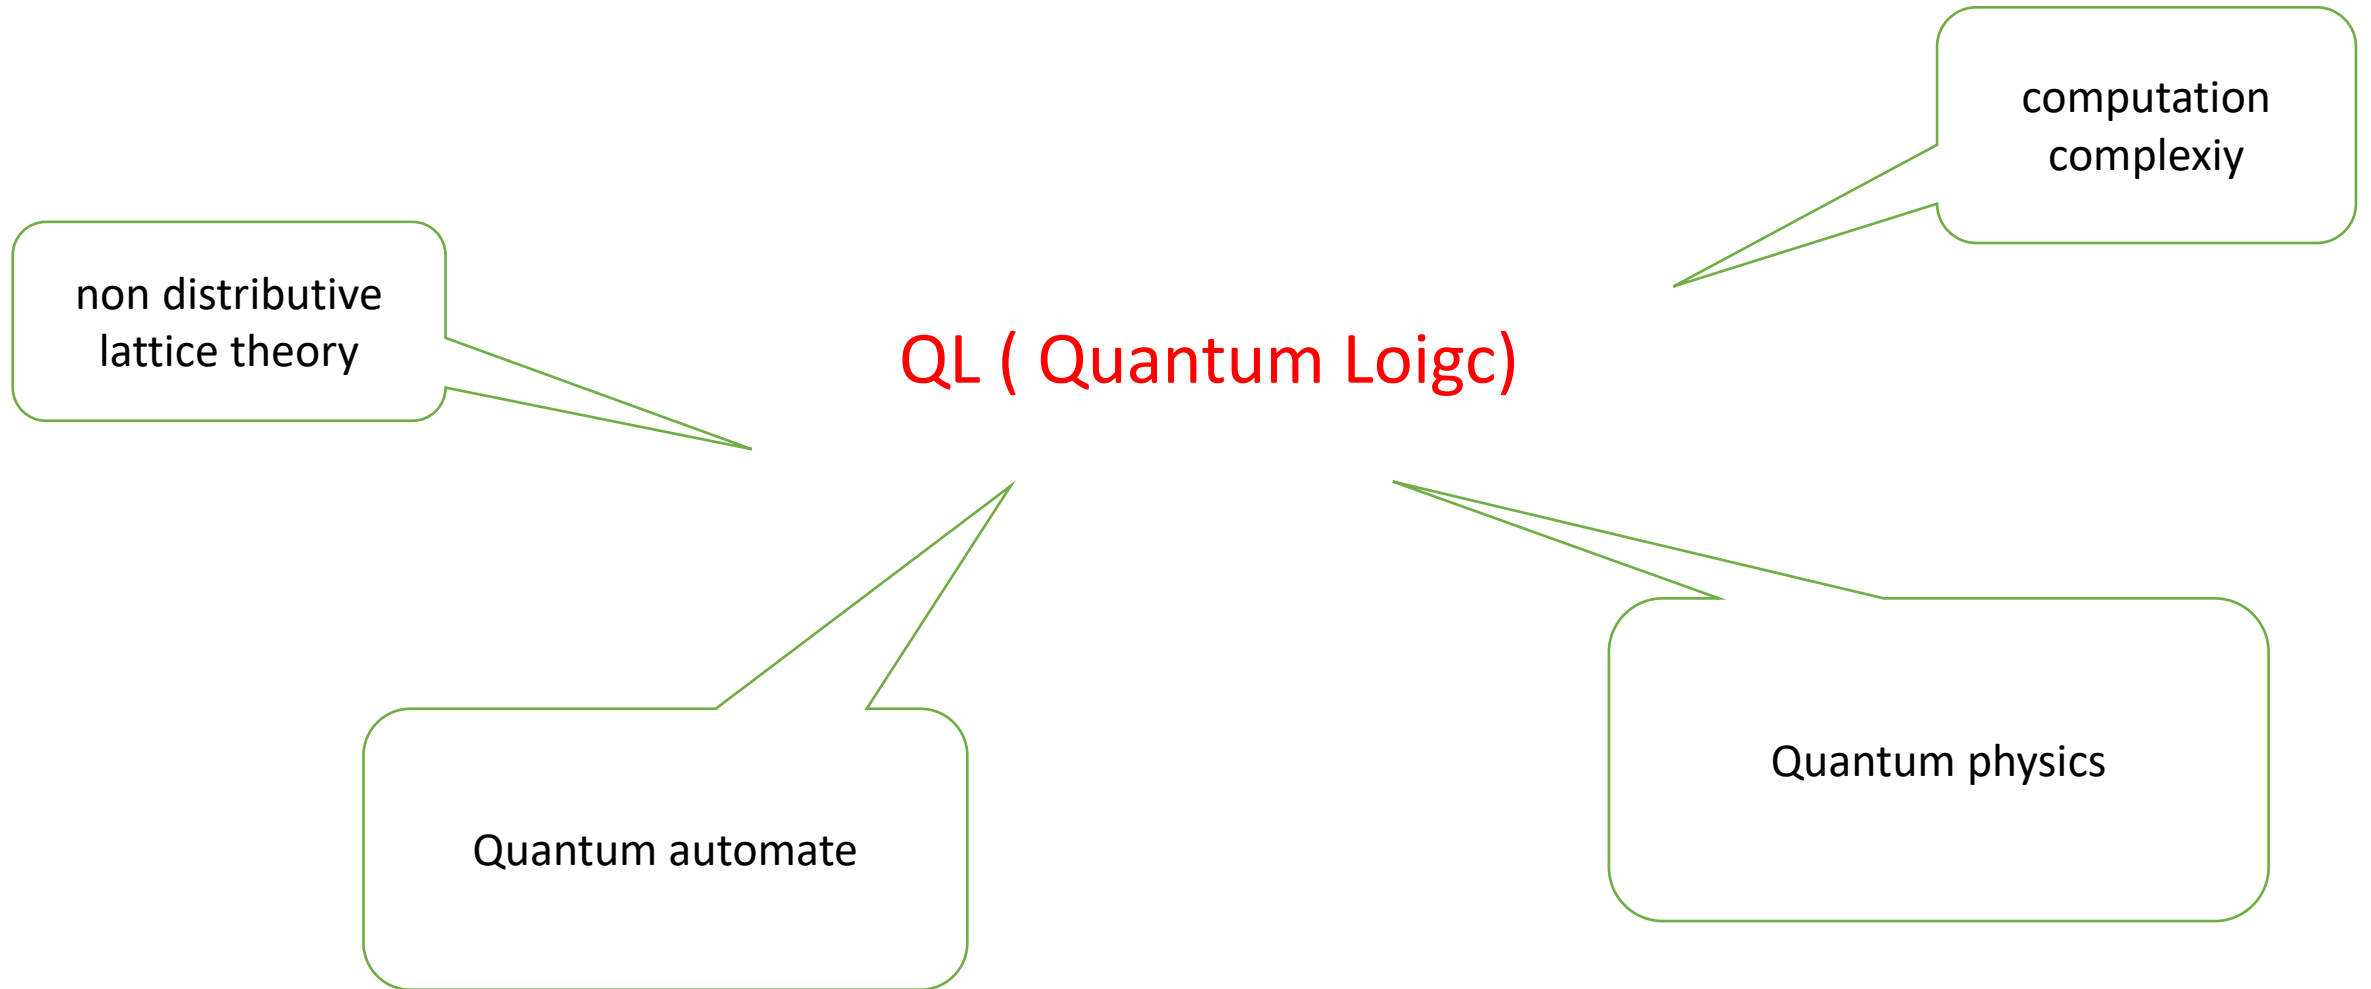

## Lecture 3: The Siren Song of Temporal Synthesis ( 2 weeks)

# Lecture 4: The Many Valued and Nonmonotonic Turn in Logic (2 weeks)

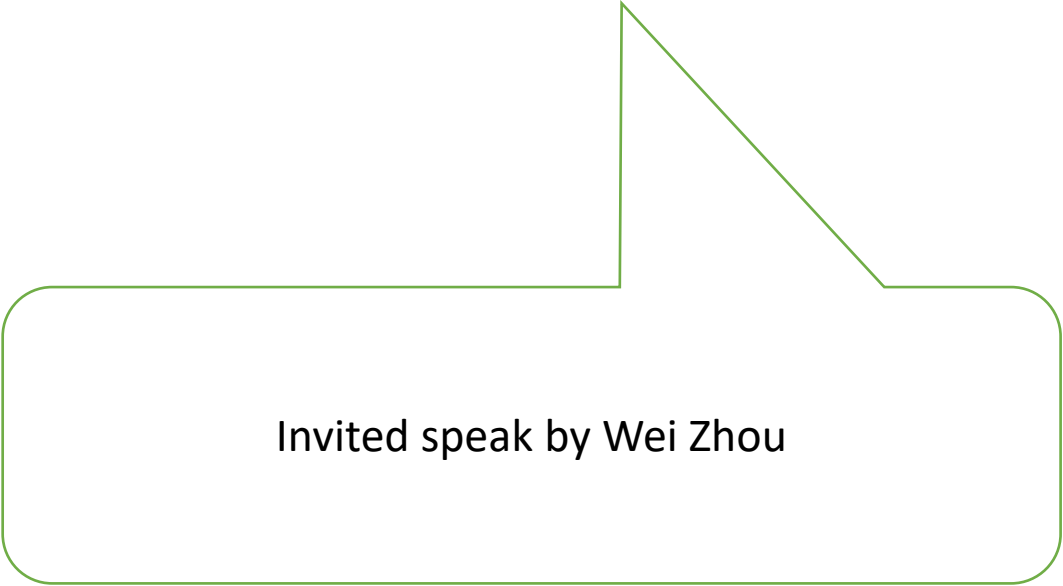

## Lecture 5: Quantum(2 weeks)

- Lecture 6: History of application of Logic (2 weeks)

## Logic and Law

Invited speak by Wei Zhou

- Final Exam:

- A thesis on any topic in this course
